**Paragon Software Group Releases Boot Camp Backup Beta – the Industry’s First All-in-One Windows Systems Backup, Restore and Migration Solution under Mac OS X**

*Enter to win one of 40 commercial licenses of Paragon Boot Camp Backup. All other beta testers get a 30% discount on the final product!*

**FREIBURG, Germany, October 20, 2014** – Paragon Software Group, the technology leader in data security and data management solutions, today announces the release of Paragon Boot Camp Backup beta – the first unified backup, restore and Windows system migration software for Mac OS X. Dual-boot users are invited to download and test the new software free of charge at <http://www.paragon-software.com/support/betatesting/boot-camp-backup-beta/betatesting.html>. Forty of the most active beta testers will get free commercial licenses while the other beta testers get a 30% discount on the commercial release, scheduled for November 2014.

***Why to use Paragon Boot Camp Backup?***

Time Machine, the backup software distributed with Apple OS X, does not back up Windows partitions under Boot Camp configuration, leaving Mac users under data loss threats. Paragon Boot Camp Backup addresses the needs of Mac users utilizing the Windows operating system by providing a sector-based backup of all Windows data on Mac. Paragon Boot Camp Backup allows Mac users to not only backup but, in case of a disaster, restore Windows partitions in a matter of minutes. The new software also allows full system migration without any risk to data loss or system stability.

**Typical Usage Scenarios**

- Back up Boot Camp and restore selected files/folders on the same system (e.g. when they get accidentally deleted)
- Migrate the full system to a different Mac

**Key Features & Benefits**

- Sector-level backup: create file system backups.
- Backup to VD: store data in a virtual disk. The user can mount this disk and access

the partition data at a point in time, when backup was done.

- Incremental imaging: back up only changed sectors. Incremental imaging improves backup efficiency and reduces storage disk space required by the image.
- Schedule backup: automate regular backup operations.
- Selective restore: easily extract files and folders from a backup image without the need to restore the entire image.
- Windows migration: migrate Windows OS from one Mac computer to another.

### **System Requirements**

- OS X 10.8 Mountain Lion
- OS X 10.9 Mavericks
- OS X 10.10 Yosemite

### **Availability:**

Paragon Boot Camp Backup beta is available for immediate download free of charge at <http://www.paragon-software.com/support/betatesting/boot-camp-backup-beta/index.html> The commercial release is scheduled for November 2014. Users of Paragon Boot Camp Backup beta will get a 30% discount on the commercial product at that time.

### **About Paragon Software Group:**

Paragon Software Group is an innovative software developer focused on two dynamic growth markets. The company's comprehensive product line for the data storage market addresses the needs of data security, storage and management for PCs, servers and networks. A second portfolio of products focuses on mobile productivity applications for handheld devices. Founded in 1994, Paragon Software has offices in the USA, Germany, Japan, Poland and Russia, delivering its solutions to consumers, small business and enterprise clients worldwide through a network of Value Added Resellers, distributors and OEMs as well as online through the company website. Paragon Software provides technology to a host of world-class companies and partners including Belkin, Bosch, Cisco, D-Link, Dell, Toshiba, HP, Western Digital Corp., ASUS, Seagate, LG Electronics, Logitech, Buffalo, Acer, EMC/Iomega, Siemens, Lenovo, Microsoft, Motorola, Nokia and ZTE. For more information please visit the company website at [www.paragon-software.com](http://www.paragon-software.com).
