## **CeBIT 2004: Paragon Software Group demonstrates unique comprehensive data security and management technology solutions**

*Innovative data security and management solutions based on Paragon's unique partitioning and imaging technology*

### **Buggingen, 3<sup>rd</sup> March 2004**

Paragon Software Group, the European specialist for innovative data security and data management technology, presents at the upcoming CeBIT (March 18 to 25, 2004, Hanover, Germany) the next generation of comprehensive system utility solutions. Paragon Software Group will show the new Universal File System Driver (UFSD) technology, implemented in applications for Windows and Linux operating systems.

### **Innovative data security and system deployment solutions**

The highlights of the demonstrations taking place at the booth E28 in hall 5 include Paragon Hard Disk Manager and Paragon Drive Backup applications, especially designed to meet requirements of the business world as well as home users for data security and accessibility. Furthermore, a full script-based deployment solution especially developed for system assemblers and value-added resellers will be shown.

The latest Paragon Software data security and system deployment solutions are

Drive Backup 6.0 - a comprehensive backup and migration solution that now allows fulfilling backup operations on-the-fly (even for system partitions) and burning backup images on DVDs or over networks.

Hard Disk Manager 6.0 Deployment - professional disk management tool with network support includes backup, partitioning and boot management functionalities, as well as network support. This makes it a perfect choice for all kind of disk management tasks and professional disk deployment. Multiple image access upon restoration and server support (Win 2000, Win XP and Win 2003 Server Win PE versions are supported) are among the highlights of this product.

## **Unique data management solution for multiple boot configurations**

Paragon Software Group presents among other novelties a unique data management solution for multiple boot configurations. It stands out thanks to its exceptional data transfer performance and accessibility to all major file systems, ranging from FAT, NTFS, Ext2/3FS to SCO<sup>®</sup>FS. This enables professionals and companies to access and transfer data independently of operating systems restrictions. Based on Paragon's Universal File System Driver (UFSD) this unique technology is now available in Paragon Mount Everything and NTFS for Linux.

The Paragon Software solutions support the entire spectrum of operating systems ranging from DOS, Windows<sup>®</sup> 9x, ME, 2000, NT, XP, Professional, Server and Advanced Server to Linux.

The press has the opportunity to receive detailed information about the mentioned technologies and applications. The technical experts of Paragon Software Group will be glad to pass over all the details during one-to-one meeting at CeBIT 2004

### **Paragon Software Group – Company Profile**

Paragon Software Group (PSG) is a German based company founded in 1994, with representation in Germany, Switzerland and Russia. Next to European markets, Paragon Software Group is also active in US and Asian markets. PSG includes following divisions: Smart Handheld Devices (dictionaries, games, utilities and handwriting recognition for SHD), Epocware (software for Symbian platform), Intelware (internet related software development).
