

Drive Backup Server Express 2008

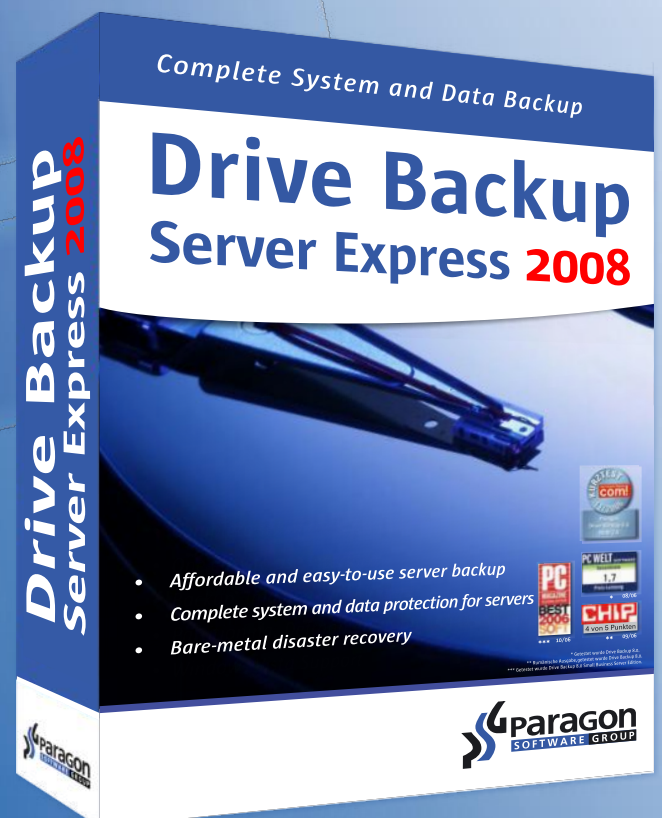

Bare-metal restore for your disaster recovery plan!

Key Features and Benefits:

Affordable and easy-to-use server backup solution for small companies!

Drive Backup Server Express 2008 is designed and targeted specially towards small companies that do not have nor may not be able to afford their own IT person and do not wish to outsource these duties. It provides the users with all of the functionality required to manage their own server backups. Server Express allows the user to perform an entire server restore in just minutes if a catastrophic event occurs. Thus, the product provides small companies with reduced server downtime and a decreased Total Cost of Ownership (TCO). It does not require any special hardware and also allows the user to perform a restore from a bare-metal state.

- Cost-effective System/Data Protection for Servers without interrupting its work
- Protect your server during critical operations, such as upgrades and OS patches
- Restore from a bare metal state
- Backup to any media, including USB and Firewire devices
- Minimize IT costs on server backup management. You don't need to be an expert to manage your backup strategy
- No complex hardware required
- Reduce server downtime by using rapid server recovery
- Decrease Total Cost of Ownership (TCO)
