**Erasing some or all data on Mac has never been easier even if your Mac fails to boot!  
New Paragon Disk Wiper 15 for Mac OS X Free for efficient hard disk sanitization and  
permanent deletion of sensitive business or private data**

*Paragon Mac ToolBox portal offers an array of Mac tools to solve anything from  
operating systems incompatibility issues to redistribution of free space between Mac and  
Windows partition*

**FREIBURG, Germany, February 16, 2015** – [Paragon Software Group \(PSG\)](#), a leader in data protection, backup and disaster recovery, announces the release of Paragon Disk Wiper 15 for Mac OS X Free – a utility to efficiently clean hard disks and SSDs or permanently erase critical data on separate partitions or entire hard disks. As research has shown, the ‘trim’ command to delete data on the entire drive or individual volumes does not completely remove all traces of your personal data. Trimming is accomplished by a delete operation in relatively large blocks while remnants and entire small files remain intact; some data still stays on the drive in segments. Besides, all storage service areas containing active user data remain intact.

To be confident your data on SSD doesn’t fall into the wrong hands, you have two options: either physically shred your SSD into pieces that are small enough that a single chip cannot escape damage, or use a specialized data erasure utility that supports solid state drives, like Paragon’s Disk Wiper for Mac. Paragon’s solution is a free utility that performs a secure and permanent wipe within 20-30 seconds.

With Disk Wiper for Mac, wiping is not accomplished under Mac OS X, but from a special Linux-based flash stick that can be easily created from the program. After booting the Mac from this device, the Wipe Wizard can irreversibly remove confidential data in just a few easy steps. Multiple sanitization methods are available: “SSD Trim” (recommended for SSDs),

selecting a specific algorithm, or a user-created method. Unlike traditional HDD-based wiping methods, “SSD Trim” works very quickly and is completely safe for SSDs.

**Key features at a glance:**

- Creates a bootable wiping media in a few clicks
- Wipe exactly what you need – the entire hard disk or separate partitions (primary, extended, logical)
- Wipes data even if the Mac fails to boot
- Supports ten different disk sanitization algorithms
- Paragon’s powerful “SSD Trim” algorithm guarantees irreversible secure data destruction on SSD storage devices without causing unnecessary and undesirable wear
- Flexible customization options allow to create your own wipe algorithm with minimal effort - define up to four wiping patterns, number of passes for each wiping pattern and for the group of patterns, thus resulting in over 40000 possible number of passes.
- Wipe report with extended hardware and system information to verify the accomplishment of the wipe operation

**Paragon Mac ToolBox portal**

The new Paragon Mac ToolBox web portal makes it easy to find which of the company’s products can be used to solve particular Mac-related problems. For example, a user who wishes to reallocate disk space between OS X and Windows after using Boot Camp is directed to Paragon Camptune X. Or if the issue involves the use of an external drive in NTFS format, the Mac ToolBox reveals that Paragon NTFS for Mac 12 provides full read/write access. Some of the tools described in the Mac ToolBox are available free of charge, including Paragon Boot Camp Backup Free to back up Windows under OS X, while all commercial products are available on a time-limited demo basis.

**Requirements:**

Paragon Disk Wiper 15 for Mac OS X Free supports all OS X 10.6 and higher.

**Availability:**

Paragon Disk Wiper 15 for Mac OS X Free is available at <http://www.paragon->

software.com/home/dw-mac/ **Paragon Mac ToolBox portal** with additional solutions for dual-boot users is available at <http://www.paragon-software.com/mac/>

**About Paragon Software Group:**

Paragon Software Group is an innovative software developer focused on two dynamic growth markets. The company's comprehensive product line for the data storage market addresses the needs of data security, storage and management for PCs, servers and networks. A second portfolio of products focuses on mobile productivity applications for handheld devices. Founded in 1994, Paragon Software has offices in the USA, Germany, Japan, Poland and Russia, delivering its solutions to consumers, small business and enterprise clients worldwide through a network of Value Added Resellers, distributors and OEMs as well as online through the company website. Paragon Software provides technology to a host of world-class companies and partners including Belkin, Bosch, Cisco, D-Link, Dell, Toshiba, HP, Western Digital Corp., ASUS, Seagate, LG Electronics, Logitech, Buffalo, Acer, EMC/Iomega, Siemens, Lenovo, Microsoft, Motorola, Nokia and ZTE. For more information please visit the company website at [www.paragon-software.com](http://www.paragon-software.com).
