### Benefits

HDM 2008 Suite provides you with the most complete set of hard drive maintenance tools available.

Easy to use wizards help you take full advantage of the power of HDM 2008 Suite.

Advanced tools let you control your hard drive, the number of partitions and the type of backups you may need.

Defragmentation is the best method for achieving top system performance: the file system is always tuned for maximum performance.

Provides fast, easy and complete recovery (including the Operating System, software and data) in case of system crashes, hardware failure or other disasters.

Creating backups makes it easy to restore your system to a previous and specific date and time. HDM makes both backup and restoration a snap!

Keep your personal data protected when exchanging or destroying a hard drive. Quickly and permanently delete all of the personal and confidential data.

**Fully compatible with Microsoft Windows Vista. Includes updates and new product features as soon as they are available throughout the renewable service period.**

## Launcher

HDM includes the Launcher, which makes the selection of the most appropriate functions much easier. All of the functions are divided into categories, which reflect the different solutions provided. To the right of each category is a list of the actual tools that you can choose from.
