Paragon Software Earns High Marks in TopTenReview's 2014 Ranking of Best Server Backup Software

Paragon Protect & Restore Backup and Disaster Recovery Solution Wins Top Spot in Professional Support, Receives Highest Possible Ratings Across Four Major Review Categories

Irvine, Calif. – July 8, 2014 – [Paragon Software Group](http://www.paragon-software.com), a leader in data protection, backup and disaster recovery, today announced its [Paragon Protect & Restore](http://www.paragon-software.com) (PPR) image-based backup and disaster recovery (BDR) software has earned a 9.83 out of 10 points possible in TopTenReview's 2014 ranking of [Best Server Backup Software](http://www.paragon-software.com). In addition, PPR tied with a leading global brand to capture the top spot in the professional support category, while also earning the highest possible ratings across three other server backup software categories including recovery and restoration, management tools and resource management.

“These exceptional ratings validate the value proposition that PPR brings to the table in the competitive BDR marketplace. From ease of use and implementation, to effectively protecting data spanning both physical and virtual environments, PPR is earning praise for delivering world-class capabilities to our customers,” says Tom Fedro, president of Paragon Software Group Corp. “Equally important is our top rating in professional support, which can't be underestimated and is the direct result of our investment in the team of experienced, California-based engineers who staff our support efforts 24/7/365.”

Featuring expert reviews and comparisons on the latest software, web services and more, the TopTenReview website attracts five million visitors each month. PPR was recognized by the popular reviews website for offering a comprehensive agent-based solution for physical machines as well as an agentless solution for virtual machines. The software, optimized for small to midsize business and mid-enterprise markets, is designed to meet the most demanding needs of physical, virtual and hybrid server environments.

Results of an independent customer satisfaction survey – separate from TopTenReview – underscores Paragon's commitment to excellence in support, with the company earning a 9.8 rating out of 10 total points possible. Survey results, along with customer comments, can be found online at <http://paragon->

downloads.com/events/testimonials. TopTenReview's in-depth look at PPG is also available online at <http://server-backup-software-review.toptenreviews.com/paragon-review.html>.
