Paragon Software Group launched Partition Manager 7.0

The Latest Edition Partition Manager 7.0 Provides Easy and Reliable Hard Drive Partitioning and Full-range Hard Disk Management

September, 2005- Paragon Software Group, the European specialist for innovative data security and data management technology, introduced the new improved version of the leading Paragon Partition Manager. Latest 7.0 Edition includes new features and significant program core engine improvements, which result in increased program performance and productivity. Partition Manager 7.0 now comes in three editions: Personal, Professional and Server to fulfill the needs of a large enterprise as well as a home user or a small business owner.

Paragon Partition Manager enables to create, format, resize (hot resize), merge, undelete, move, copy, and convert safely and quickly partitions for storing valuable information, data files, applications, and operating systems. It does all this from within Windows and without losing any data in an active system. It works the most reliably, considering it's making fundamental changes to the file structure of single PC, network or server.

User-friendly interface allows advanced and novice users to work efficiently and accurately with the software. New wizards, so easy in use, lead user through some advanced partitioning tasks, such as merge partitions, undelete or redistribute free space.

To maximize system performance Partition Manager furthermore provides a powerful defragment utility and the ability to dynamically adjust cluster sizes significantly increasing system speed. Partition Explorer allows to move files from one partition to another regardless of partition type improving thus data management in multiple file system configurations like Linux and Windows®.

Partition Manager also Includes: BootManager to automatically install and run multiple operating systems; Recovery CD, bootable CD that contains full functionality of the program and additionally offering full access to all FAT, NTFS, Ext2 and Ext3 partitions on local hard drives; a powerful script generator helps to create and run scripts to automate common partitioning task.

New Server edition was designed specifically for computer specialists maintaining large systems or OEMs. With this edition IT professionals will be able to get optimum performance from PC, workstations and servers, automate
