Paragon File System Link for Android
ADD EXTERNAL USB STORAGE SUPPORT TO YOUR APP

PARAGON SOFTWARE

Paragon File System Link for Android is a valuable enhancement for Android app developers. Our technology allows app developers to add external USB storage support to a file manager or media player app. This way, end users can access and use files from USB flash drive directly on their Android devices.

Paragon FSL for Android in a nutshell

- USB support for your app: enable read-write for all popular file systems
- Integrated with Microsoft exFAT/NTFS for USB by Paragon Software
- Standard Android SAF API for easy integration

Who benefits?

App developers who want to add an extra value to their app and thus increase user retention.

Most common use cases:
- file manager apps
- mediaplayer apps

What's inside?

Connect via SAF API to work with files
You already use SAF API: Open Paragon File System Link document provider directly in your app or enable users to choose it from the list.
Alternatively: first implement SAF client functionality in your application.

After the document provider is opened, you may work with documents like you do it with other SAF Providers, such as Google Drive's provider or in-built Android »Downloads«, »Images«, »Videos«.

Add USB Support to your media player app
Enable users to watch high definition movies via your app. Typically, the user stores HQ movie files on the external USB storage device. Now, all the user needs is a media player app that can mount those USB devices via USB OTG and open the movie files.

Detailed features

	Full RW access to USB storage connected to Android device
	Support for all popular file systems: Microsoft exFAT/NTFS/FAT32 and HFS+
	Copy, move, delete, rename files on the USB drive and between USB and internal device memory
	Watch and listen to media located on USB drive using your Android device
	Easy and effortless integration

Licensing

The integration package is available free of charge.
Feel free to get the interfaces here.

About Paragon Software Group

Since 1994, Paragon Software Group has delivered a wide range of software tools, solutions, and technologies. Our offerings range from low-level storage management and file system drivers to safekeeping and recovery of operational, business, and user data across hetero-geneous platforms and environments.
